

Quality lifts that last!

No trouble with my Ommes

Ommelift visited Kristian Rasmussen at his rental company KR-udlejning, in Denmark. Kristian has for many years been satisfied with his trailer mounted Ommelifts.

For Kristian, his machinery must have a long lifespan and be user-friendly to his customers. It is essential that new users can apply the equipment easily.

“Each customer get an operator instruction. I choose Ommelift because customers don’t experience hassle while using them”

If the lifts are too complicated to use, he knows he will spend a lot of time instructing the customers over the phone. He explains that this is not happening with an Ommelift.

KR-Udlejning services both private and business customers. Their lifts must work every time, and customers must not experience operational problems. KR-Udlejning depends on their reputation and the customer advice Kristian and his employees deliver.

Built to last – we asked our users

Kristian has five trailer mounted lifts from Omme. The oldest lift is from 2007 and still works impeccably. In spite, Kristian does not experience break downs. Yearly inspections and scheduled maintenance make them run smoothly.

“Once in a while, I get technical support over the phone. All minor repairs we can do ourselves because Omme delivers spare parts quickly.”

Trailer mounted Ommelifts

- ✓ **Compact dimensions**
- ✓ **User-friendly controls**
- ✓ **Rapid set-up and take-down**
- ✓ **Long product lifespan**

“When I buy an Ommelift, I get quality that lasts!”

Kristian Rasmussen, KR-Udlejning

High demand for trailer mounted Ommelifts

Often all lifts are out at the same time, so KR-Udlejning plans to expand their portfolio with yet another 1830 EX trailer mounted Ommelift, one of the types in most demand.
